This Activeaid raised toilet seat is unique in its design to accommodate perineal access from either of 4 directions. The cut-out portion of the seat can be placed over the toilet in the desired direction and the legs can be adjusted in height while maintaining a stable platform form for seating. The large seating surface is padded with a high-density foam that provides excellent support while the cut-out may offer some additional pressure relief. Because it is lightweight it is easy to move out of the way and no tools are required. The height of the seat can be easily adjusted from 18 1/2" to 21 1/2" tall. Easy to use, versatile, sturdy, and comfortable are features that combine to make this padded seat a unique bathroom aid.

Models	Seat Dimensions	Foam Thickness	Dimensions of opening	Price

Base Model #202 shown  
 Narrow Base for Tub use  
 Overall Footprint (crutch tips) -18" x 18"

The name hints at what these products are intended to do. They can be an adjustable height toilet seat, a toilet safety frame, a shower bench, bathtub bench or a transfer bench. The modular design lets you decide.

The densely padded seat has a cut-out that can be positioned to the front, back, or either side and the foam is configured in our unique **"Waterfall"** style that addresses pressure problems caused from sensitive tissue coming in contact with unforgiving surfaces. The open frame system not only affords unimpeded directional seat placement but also allows the optional back and arms to be correctly positioned without restriction and **without tools**. The 350-pound capacity frame is created from high-quality **Stainless Steel** that provides a strong, durable, non-corrosive product.

## Specifications

Adjustable legs vary seat height 19 1/2" – 22 1/2"  
 Seat width 18"  
 Seat depth 18"
